Contents Volume 43

Vol. 43 No. 1, June 1994

Multi-variable control of robotic gas metal arc welding
J.P. Huissoon, D.L. Strauss, J.N. Rempel, S. Bedi and H.W. Kerr (Ontario, Canada) 1
Performance comparison of polymer fluids in die-less wire drawing
G.R. Symmons and M.R. Stokes (Sheffield, UK) 13
Factors affecting the machinability of an Al/SiC metal-matrix composite
O. Quigley, J. Monaghan and P. O'Reilly (Dublin, Ireland) 21
An investigation of the early stages of a forging/extrusion process
John Vickery and John Monaghan (Dublin, Ireland) 37
Study of metal flow in extrusion forging of rectangular billets
W. Hu, M.S.J. Hashmi (Dublin, Ireland) and P. Liu (Anshan, China) 51
Utilisation of CNC machining centre as a three-dimensional copy mill
W.W. McKnight, G.R. Dickson and D. Crossen (UK) 61
Grinding of ceramics: The effect on their strength properties
T.M.A. Maksoud, J.E. Morgan, T.G. Fox and J.A. Scott (UK) 65

Vol. 43, No. 2–4, June 1994

A study on the strength and corrosion resistance of Zn–Al eutectoid superplastic alloys
H. Shuzhi, L. Minzhu and M. Longxiang (Shenyang, China) 77
Deposition, characterization, thermo-chemical compatibility and failure analysis of multi-layer coated silicon-carbide fiber-reinforced metal-matrix composites
R.S. Rastogi and K. Pourrezaei (Philadelphia, USA) 89
Thermal analysis of creep-feed grinding
K.-H. Fuh and J.-S. Huang (Taiwan, ROC) 109
Investigation of acoustic sensing for laser machining processes
Part 1: Laser drilling
P. Sheng (Berkeley, USA) and G. Chryssolouris (Cambridge, USA) 125
Investigation of acoustic sensing for laser machining processes Part 2: Laser grooving and cutting
P. Sheng (Berkeley, USA) and G. Chryssolouris (Cambridge, USA) 145
An investigation of an expert system for sheet-metal bending design
Z.-C. Lin and G.-J. Peing (Taiwan, ROC) 165
A strip-drawing simulator with computer-controlled drawbead penetration and blankholder pressure
J.R. Michler, K.J. Weinmann, A.R. Kashani and S.A. Majlessi (Houghton, USA) 177
The investigation of the FM heavy forging process by the Moiré method
Part I: Single-reduction results
S.L. Wang (Netherlands) and Q.X. Cao (Beijing, China) 195

The investigationn of the FM heavy forging process by the Moiré method
Part II: Consecutive reduction results
S.L. Wang (Netherlands) and Q.X. Cao (Beijing, China) 211
Numerical simulation of the microstructure in the ring rolling of hot steel
S.G. Xu and Q.X. Cao (Beijing, China) 221
Capillary rheometer measurement of a plasticine used in order to simulate the hot extrusion of metals
J.F. Dupuis, J.P. Villemaire and E. Felder (Cedex, France) 237
A study of the ultrasonic-vibration cutting of carbon-fiber reinforced plastics
J.-D. Kim and E.-S. Lee (Taejon, South Korea) 259
3-D finite-element simulation of the cold forging of helical gears
V. Szentmihali, K. Lange (Stuttgart, Germany), Y. Tronel, J.-L. Chenot (Valbonne, France) and R. Ducloux (Cedex, France) 279
Temperature and pressure effects on the melt index and melt density of high-density polyethylene
A.C.-Y. Wong (Hong Kong) and J.Z. Liang (China) 293
Researchware: Simulation of a hydraulic short-stroke device for deep drawing
S. Thiruvarudchelvan (Singapore) 305
